## Worksheet: Map/Reduce

You are given the following parallel Map/Reduce "framework" for processing a collection of Strings using Java Streams:

List<String> list = Arrays.*asList*("**Rice**", "**Owls**", "**are**", "**the**", "**best**"); **var** value = list.stream().parallel() .filter( B .map( С .reduce(\_

Using this framework, solve the following problems by filling in the blanks A, B and C (note that C) can be 1, 2 or 3 arguments, depending on which variant of reduce you choose):

- them
- 2. Find the total length of all the strings that start with a lowercase letter

1. Find all the strings that contain the letter "s", convert them all to upper case, and concatenate

COMP 322, Spring 2023 (M. Joyner)
