Worksheet #10: RecursiveAction Computation Graph

Name:	Net ID:	
1) Consider the compute		
method on slide 9. Let us		
suppose we supply it with		
an 8 element array with		
values [0,1,2,3,4,5,6,7] and		
THRESHOLD value of 2.		
Draw a computation graph		
corresponding to a call to		
compute with the		
appropriate fork and join		
edges.		
2) Define each direct		
· · · · · · · · · · · · · · · · · · ·		

2) Define each direct
(sequential) computation as
2 units of work and each
recursive subdivision as one
unit of work.

What is the total work? What is the critical path length?
