Errata in the Comp 211: Midterm Examination

Due: at the beginning of class, Friday, February 20, 2009

The exam includes the following errata.

1. In the synopsis of the Scheme language used in the exam, the recognizer predicate named rational should have been named rational?.

2. In Problem 1 item 4, the Scheme expression is missing a closed parenthesis. You will get 1 point credit for correctly inserting the missing parenthesis.

3. In Problem 4, the type given in the contract for fold should be \((A \ B \to B)\) not \((A \to B)\) as written.
