

DMC Resources for Podcast Recording

Equipment:

- Zoom H4N and H2N Audio Recorders
 - For recording audio without being connected to anything
 - Very portable, can be battery operated (DMC does not provide AA batteries)

- Rode and Blue Yeti USB Mics
 - USB microphones that easily interface with any computer
 - Can be used to record directly into an Audacity or Garageband project

- Rode Videomic Me, Me-L, and Smartlav+ Mics
 - Microphones compatible with smartphones and tablets
 - Can be used to record podcasts using voice memos on your phone or tablet
 - We provide the necessary dongle for the smartlav+ mics to use with an iPhone

- DMC Audio Studio
 - We have an audio studio that is set up to record up to 4 concurrent microphone inputs
 - Allows you to record directly into Garageband or Audacity
 - Can be reserved through the Fondren Study Room Reservation System
