Open Community Runtime

The Habanero group is actively involved in both the development of the Open Community Runtime (OCR) core and its ecosystem.

High-level language and programming environment projects

- HClib: A library approach to the Habanero-C language running on top of OCR. (GitHub)
- CnC-OCR: A Concurrent Collection implementation targeting the OCR programming API. (GitHub)

OCR core extensions projects

- Support for distributed OCR
- GPU integration (coming)
