

Tips and Tricks for Video Recording

Please click on the following link for a comprehensive guide:

[video-interview-recording-tips](#)

In addition, please also refer to our following findings, tips and tricks:

For music, Canon R700 in auto mode, Zoom overlaid on video camera is the best, followed by the internal-mic.

For talk, Canon R700 in auto mode, internal mic or shotgun mic works well.

Affecting factors:

- camera mode
- distance between the camera/mic and the subject (in our situation, camera and mic are placed together. but they could be placed in two places, closer or farther to the subject)
- room (we can't compare this factor since we don't have footage recorded in other rooms)
- input level on the audio recorder or mic (do we have any notes for this, for instance, the input level for Zoom)
