

# CTBP Computing Activities

Welcome to the CTBP computing wiki. This is a resource that we will use for all CTBP researchers to post information about ongoing activities. In particular, we ask that everyone posts a brief description of any notable software developed in CTBP. This will help us keep an inventory of what is going on, while also facilitating support for other CTBP researchers.

If you would like to add to this Wiki, please contact Paul Whitford (p.whitford at northeastern.edu)
