

Acknowledging Resources and Support

It is very important that you always acknowledge resources that have enabled your work (e.g. grants and computing facilities).

For all work performed at CTBP, at any capacity, please include the following statement in the acknowledgements section of all publications:

"Work at the Center for Theoretical Biological Physics was supported by the NSF (Grant PHY-2019745)."

If you used the Penguin On Demand (POD) cluster, or the Aires Cluster, which were provided by AMD, then please include the following statement in the acknowledgements section of all publications.

"We would like to thank AMD for the donation of critical hardware and support resources from its HPC Fund that made this work possible."
