

Flash Player

For a 64-bit machine flash player was always a problem. I followed the simple instructions on [this wiki page](#), and everything works well

1. Install flashplugin-nonfree package

```
# apt-get install flashplugin-nonfree
```

2. Install the Adobe Flash Player:

```
# update-flashplugin-nonfree --install
```

3. Enjoy Youtube or Hulu on your Chromium or Iceweasel browsers.
